FAIL

Standard RV Solution for a Typical 50AMP RV Hookup.

STANDARD RV SOLUTION

Standard Coach and Trailer Issues

- They are NOT configured for Typical RV Hookups with 30Amp Plug and 20 Amp GFCI
- Existing Aftermarket Solution “Y” Boxes are not built for Dual AC usage for it trips the 20 Amp GFCI Circuit Breaker on contact when used.
- Creates need for investment in JTB or use of existing JTB in Coach.
